

# Through My Eyes – Developing Your Early Years Setting from the Child's Perspective

Best practice in early years asks that we not only develop our learning environments to support individual learning but that we take the child as the focus for planning and extending their exploration and learning opportunities. To be able to do this effectively we first have to be able to see the world through the eyes of the children we work with.

What can I expect from the Course?

This workshop is created to make practitioners think twice about both the child's physical environment and how everyday experiences look from a child's perspective. Drawing on child development theory it aims to help you develop a range of practical ideas and solutions for use in your setting.

Free Resources

All attendees receive a pack containing resources and equipment to help support child-centred learning in your setting.
