

# Why Display?

## Building Interactive Displays for and With Children

How often do we actually stop and think about why we are spending hours creating beautiful, perfect displays? Are we doing it for the children or for other parties? (parents? OFSTED? Etc). We need to be displaying children's work for the right reasons and in a way that they are able to continue to access it.

### What can I expect from this Course?

This is a very practical, hands-on look at creating child focused displays for children of all ages. Looking at how we can involve children in their development as well as ensuring that displays encourage continual interaction. The course supports both Unique Child and Enabling Environment elements of the EYFS. This session involves lots of fun activities and is not for those who don't like getting messy!!!!!! Suitable clothing a must for this one!!!

### Free Resources

All attendees receive a pack of resources and books to build on the ideas developed during the session. Includes art materials, artefacts and books.
